Tidewater Distressed Realty Fund

Final Wind-Down Update — Fourth Quarter 2025

Tidewater Asset Management • Closed-End Distressed Fund (in liquidation) • Vintage 2011

Status

The Fund is substantially wound down. A single residual position — **the final tranche of a distressed retail mortgage note** — remains, valued at approximately $0.11 million at quarter-end. No distributions were made during the quarter.

Track Record

Over its life the Fund generated a since-inception net IRR of approximately 20.0% and a 1.90x net equity multiple. The Manager anticipates a final residual distribution and Fund termination in a future quarter.

Note

Given the immaterial remaining balance, no further quarterly performance figures are reported.
